For immediate release.

25N Coworking annexes 5,300 sq. ft. to expand Geneva, IL campus in late summer 2017.

The workspace will offer new fully-furnished private offices & small team suites, dedicated desks, and additional shared open flex space.

Geneva, IL – July 17, 2017 – Increased demand and real estate opportunity has resulted in the second 25N Coworking expansion in Geneva within a year. Select private offices & suites will feature views of the Fox River, exposure to State Street, courtyard views, and/or interior windows with views of open flex space. All workspace options come fully furnished.

Although the annex is only a short walk across the courtyard from the current 25N Geneva location (and will retain full access to that space), the site will be a fully-developed, self-sufficient coworking space with flagship coworking amenities such as:

- Fully-furnished private offices
- High-performance Wi-Fi
- Hard-wired Ethernet
- Meeting rooms
- 24/7 access
- Community café/break room
- Complimentary micro-roasted coffee, teas, and waters
- Private phone booths
- Brainstorming walls
- Concierge office services like printing and shredding
- Janitorial services

The space is currently under extensive renovations and the layout includes a newly-designed member lounge and game room, plus other surprises like balcony access and flex space enclaves for increased privacy.

25N Founder + CEO Mara Hauser on the need for more space: “We’ve established a brand and a culture that has driven membership from all over the Chicago suburbs—essentially requiring us to annex more space to meet the demand. Our space in Geneva was initially designed to meet the needs of one suburban community, but we’ve evolved to contribute economic

development to the larger region—influencing coworking trends and success measures nationally and internationally.”

She continues, “The tremendous growth projections of the coworking industry have also influenced our expansion plans. By the year 2020, industry analysts expect coworking space membership to grow from its current 976,000 members to a staggering 3 million or more—we have to be ahead of the curve to accommodate these numbers and maintain our position as a leading-edge company that offers innovative workspaces.”

25N offers productive environments and economic development for members, local businesses, and the region through deliberate community development and professionally-designed workspaces. Resources include meeting rooms and office amenities, programming & events, communication platforms, business development resources, and value-added partnerships to promote a culture of collaboration, diversity, and growth.

Move-in-ready, fully-furnished private offices start at \$650/month; dedicated desks at \$365/month; and open flex space plans start at \$99/month. Club 25N Membership is included.

For a limited time, new members receive their first month free when they submit a deposit on private or semi-private workspace.
